Don't buy any other until you have given this a trial.

AGENTS WANTED

THE MACHINE WASHES EVERYTHING from the
ing. It washes a dozen or more articles at once, the
would otherwise occupy a whole day. It washes upon the
does not injure even the finest fabrics.

The machine is so simple and yet so substantial in its
so effective in its operation, that all who use it acknowledg-
one of the most labor-saving inventions, inasmuch as al-
duced, have failed to give satisfaction. Whatever you
must see this one. It does not partially wash the clothes,
the work perfectly and completely, doing away with the
actually less injurious to the clothes. It saves time, labor
used on a carpeted floor without soiling it. With it a doz-

"A man
works
from
Sun to Sun,

But a woman's work
Was never done"
Until Terriff's
Perfect Washer

Came to her ken, And now
She's through before
the men,

finest Linen or Lace to heavy blankets or Bed Cloth-
ereby accomplishing in an hour or so as much work as
the same principle as hand rubbing, yet so gently that it

construction, so neat and compact in form, and withal
age it to be all that is claimed for it. It it decidedly
most all so-called washing machines, heretofore intro-
prejudices may be against washing machines, you
leaving them to be finished by the hand, but does
the washboard and hand rubbing altogether, and is
or and soap, makes no slop, but if necessary can be
en articles of average size can be washed within five
minutes. We challenge competition
by any other machine for the purpose
ever invented.

1. Because it does not rub the but-
tons off.
2. Because you stand straight
when washing.
3. Because it saves one-half the
time and labor, doing an average
washing in from one to two hours.
4. Because you do the work with
the machine and not with the hands.
5. Because it adjusts itself to any
thickness of cloth.
6. Because it is light and easy
running. A child can do a good
washing with it.
7. Because it pays for itself in
saving wear and tear alone on the
clothes in a short time, as there is no
friction on the clothes.
8. Because you can set it in any
place while washing. No slopping
all over the floor. No mopping.
9. Because you do all the rinsing
in the machine and the entire wash-
ing can be completed without the use
of washboard or tub.

The Machines are all made from
Mississippi White Wood. The Wash-
boards are made from Hard Maple,
and all the joints made in Pure White

Lead, which makes it the best Machine in the market.

It is certainly one of the greatest of household comforts. It is made of the best material and will last a lifetime. The pressure appliance is the most novel and successful ever invented, and is far ahead of all others, and can be used only on Terriff's Perfect Washer, being covered by letters patent.

It is hardly necessary to say anything more in favor of the general character of our Washer, for it is a well-known fact that this is the only principle of successful washing, and the Machine has stood the test and has proven itself to be the Machine to do the work for which it was intended. All other systems, steaming, suctions and pumping machines have proven a failure, and we do not consider them competitors.

Any number of testimonials can be furnished in favor of this Machine, but no one is asked to buy until they have tested its merits for themselves. It is left on trial, and the fact that after being once used it is purchased in almost every instance, is conclusive evidence of its value. Good live men are wanted in every locality to introduce these Machines.
